

FOR IMMEDIATE RELEASE

Indecomm Joins Los Angeles County in Advancing eRecording

Lenders and Title Companies Benefit from the Expanding Footprint of Indecomm eRecording

News Highlights:

- eRecording from Indecomm now offered in Los Angeles County
- Indecomm a trusted submitter in 540 counties
- Company expands eRecording across the nation

St. Paul, MN (January 15, 2014)—Indecomm Global Services, a leader in business process outsourcing, learning, and technology solutions, announces that it is now engaged in eRecording with Los Angeles County, the largest county in the United States with nearly 10 million inhabitants. This affiliation enables lenders and title agents to use Indecomm’s Trusted Submitter status to eRecord their Real Estate documents.

“It is with pride that Indecomm joins forces with Los Angeles County,” said Rajan Nair, President, Financial Services Division, Indecomm Global Services. “The County’s size and our expertise provide a good union, which benefit mortgage professionals and the home buyers in Los Angeles. In the future, it will offer even more benefits as eRecording disseminates among industry professionals.”

Indecomm recently crossed the 500 county mark with eRecording and has continued to grow to over 540 counties. The company's approach has been to maximize the benefit of eRecording by focusing on large population centers.

“The economies of scale which Indecomm can bring to a large market like Los Angeles can help homeowners and lenders lower costs and increase efficiencies,” said Latha Parameswaran, Vice President Operations, Indecomm Global Services. “Over the past year Indecomm submitted more than 15,000 paper documents and in the future many of these may be submitted electronically where it is economically feasible.”

Indecomm's mortgage document management solutions are a holistic approach to recording mortgage documents. Indecomm efficiently handles paper and electronic documents through eRecording as well as image-based recording quality control and walk-in recording services.
