

**FOR IMMEDIATE RELEASE**

**IncomeGenius® announces BBVA Compass as a user of Automated Income Calculations with IncomeGenius®**

**Edison, NJ – MAY 29, 2019** –Indecomm Global Services, a leading provider of business process as a service (BPaaS), software as a service (SaaS) technology, and learning solutions for the mortgage industry, today said that BBVA Compass has selected its IncomeGenius® software as the automated income calculation platform for its mortgage business.

IncomeGenius® enhances the mortgage loan origination process by getting accurate income information right at the beginning of the loan transaction. It alerts the borrower about missing income documents and additional potential income and reduces tax return review time by as much as 50 percent.

“We at Indecomm are excited to help BBVA Compass provide their loan originators, loan processors, and underwriters with full transparency into all aspects of the income calculation,” said Rajan Nair, CEO, Financial Services, Indecomm Global Services. “The ability to have accurate income analysis from the start of the transaction will save time and money while decreasing risk and improving compliance.”

IncomeGenius® simplifies the task of calculating income by using intelligent data extraction and machine learning technology to provide a complete picture of a borrower’s income. The automated SaaS technology reads and analyzes borrower income documents and calculates qualifying income associated with the mortgage loan in a consistent manner.
